## The new CT-12Pin Adapter: for the Airbus TPH900.

The versatility and breadth of connection options for professional send/receive systems also presents a major challenge to radios used.

To satisfy these technical requirements, CeoTronics has developed a matching radio adapter for the digital Airbus TPH900 radio.

The high degree of miniaturization lets the new 12pin adapter integrate very ergonomically into the handy device while still guaranteeing straightforward connectivity to professional CeoTronics accessories.

The following CT products can be operated using this digital radio with the CT-12Pin Adapter:

- CT-HR PTT
- CT-MultiCom
- CT-MultiPTT 1C, 1C Plus, 2C and 3C
- CT-All-in-One Extreme
