The new CT-12Pin Adapter for Airbus TH1n.

The flexibility and connection variety of professional headsets places high demands on the used radio.

To meet these technical demands, CeoTronics has developed an active radio adapter for the Airbus/Cassidian TH1n digital radio.

Due to the high degree of miniaturization the new CT-12Pin Adapter can be very ergonomically connected to the radio, thus ensuring easy connection of professional CeoTronics accessories.

Thanks to the intelligent amplifier electronics, it is now easily possible to operate the following CT-products with the CT-12Pin Adapter to this digital radio:

- CT-HR PTT
- CT-MultiCom
- CT-MultiPTT 1C, 1C Plus, 2C und 3C
- CT-All-in-One Extreme
