CT-ClipCom

- Weight: 22g incl. cable without connector
- Individual silicone earmolds
- Noise cancelling microphone
- Available as BoomMike or EarMike version

CT-ClipCom

Made in Germany

CT-ComLink® Technology

CT-ClipCom BoomMike and CT-ClipCom EarMike

The in-ear communication system is available with a flexible boom mike or as an ear mike variant. The BoomMike version is also available with the new CT-ComLink® technology.

Depending on requirements, a tri flange tip, a foam tip or an individual earmould, manufactured from soft, medical-grade silicone is used.

Each can simply be clipped onto the system (see picture above) and makes the communication system independent of the person. In the event of a change of personnel and with regard to the necessary hygiene, only the tip or the earmould has to be changed and a complete personal system does not have to be procured for each member of staff.This means that it is not necessary to purchase a complete personal system for each team member.

Requires no special equipment
CT-ClipCom is not permanently attached to other protective equipment or headgear and doesn't hinder their use. For use with heavy respiratory equipment, the ear microphone variant of the CT-ClipCom is an outstanding choice. The ear microphone picks up speech directly in the ear canal and is less sensitive to interfering noises from the environment.

Soft ear adapters to personalize communications products

During the use of communication systems, protecting the wearer‘s hearing is just as important as the quality of voice transmission. And with in-ear communications systems, wearer comfort is a critical factor. For decades, CeoTronics has enjoyed an enviable reputation in the three key areas (transmission quality, hearing protection and wearer comfort) and offers certified, soft ear adapters not just for its own communication systems, but also for those from other suppliers.

Optimum wearer comfort: Shore hardness of 40
All individual ear adapters from CeoTronics are manufactured from soft, medical-grade silicone with a Shore hardness of 40. This degree of hardness – named after Albert Shore – has proven its worth, since it offers superior durability, excellent wearer comfort and user-friendly cleaning options. As another advantage, it also prevents uncomfortable hardening of auditory canal cartilage, unlike ear adapters made from hard plastic materials.

Anti-bacterial nano silver coating
CeoTronics ear adapters are coated with an ultrafine, high-quality surface sealant, offering users of the send/receive system protection against bacteria and mold in the auditory canal to a level unmatched by other coatings.

Optionals:

CT-Blank ear plugs

CT-Individual earmolds

Foam tips

Tri flange tips

Explanations

Products with this label are developed or designed and produced in Germany by CeoTronics.

Products with a noise-compensating microphone screen out disturbing ambient noise and thus transmit speech particularly clearly.

Ear pieces made of soft silicone are very comfortable to wear, even when worn for long periods of time. They are very durable, easy to clean and thanks to the antibacterial nano-silver coating they offer also protection against bacteria and fungi in the ear canal.

CT-Headsets with this label are characterized by their particularly low weight.

For this product, individually molded ear pieces made of soft silicone are optionally available. These offer a very high wearing comfort even when worn for a long time. Furthermore, the material is very durable, easy to clean and has an antibacterial coating.

ISO Certified DIN EN ISO 14001:2015

ISO Certified DIN EN ISO 9001:2015

ATEX Certified ATEX Directive 2014/34/EU Annex IV

PPE Certified PPE Regulation (EU) 2016/425, Annex VIII (Module D)

CeoTronics was the first company in its communications sector to be certified according to ISO 9001:2015 back in 2016. This was followed in 2018 by successful certification in accordance with the PPE Regulation (EU) 2016/425. Since 2019, CeoTronics has been certified in accordance with the current ATEX Directive 2014/34/EU.

In February 2023, the company was certified in accordance with the international ISO 14001 standard for environmental management and sustainability – as the first EU company in the industry. The certificate confirms CeoTronics' forward-looking thinking and actions, its consistent focus on sustainable business practices, and its wide-ranging commitment to protecting the environment.

Services

The holistic service from CeoTronics:
For the best price-/performance ratio.
