

CT-GroundCom Headset

- Ground-to-cockpit Communication
- Certified hearing protection according to EN 352
- Flexible coiled cable
- Safety connection
- Robust PTT-Button

CeoTronics:
More than just headsets.

For over 30 years, CeoTronics have developed and produced innovative communication systems for demanding environments. We are the leading supplier of mobile digital radio networks and terminal equipment as well as high-quality communication headsets and systems for professional use.

CeoTronics communication systems, including effective hearing protection and other protective functions, are far superior to simple hearing protectors because users can still communicate with each other even under the most adverse conditions. Whether working, for example, in noisy or dangerous environments or wearing personal protective equipment (PPE), CeoTronics systems offer more protection in the workplace, increased productivity and efficiency.

CeoTronics provides communication systems and services for a wide variety of professional groups and can also develop bespoke solutions for your company. Let

us convince you. We have a 100 % recommendation rating based on years of customer surveys.

Certified and guaranteed
In February 2016, CeoTronics became the first company in the communications industry to be certified according to ISO 9001:2015. Then in 2018, CeoTronics successfully obtained certification according to the new PPE Regulation (EU) 2016/425. By 2002, CeoTronics was already successfully manufacturing according to the ATEX Guideline 94/9 EG for the first time. This certification according to the current directive 2014/34/EU could be renewed without any objections at the beginning of 2019.

A guarantee period of 3 years is assured for all CeoTronics products.

Efficient laboratories:
Test, measuring and testing facilities.

By choosing professional communication systems from CeoTronics, you are opting for communication solutions with German engineering know-how that deserve the “Made in Germany” seal of quality. As a holistically oriented company, we naturally also offer our customers technical services at our own testing, measuring and inspecting facilities.

We can perform the following inspections for you at our high-performance laboratory:

- Testing individual PPE products (OTP) on test subjects according to the PPE Regulation using the CT-EarGuard System
- Climate and temperature tests according to MIL standards
- Subjective and objective measurements of sound insulation in our acoustics laboratory based on the PPE Regulation
- Accompanying development EMV-Pre-Compliance examinations with GTEM cell and standard-compliant ESD-examinations
- IP tests according to DIN standard
- Case tests according to MIL standard
- Simulated submersion testing up to 30m
- Alternate bending inspections for cables
- Tensile test for plug connections

Talk to us about your requirements, we gladly develop you an customised offer.

CT-GroundCom Headset

CT-GroundCom Headset

CT-GroundCom Classic is the tried-and-tested headset for wired ground-to-cockpit communication.

Scenarios for this long-standing CeoTronics favorite include push-back operations, where dispatchers / tow vehicle drivers must maintain uninterrupted contact with pilots. Connectivity to the cockpit is assured by a high-quality coiled line, which adjusts its length during use repeatedly and automatically, and which is highly visible thanks to its orange coloration. In an emergency, the patented safety plug connector lets the headset and cable separate in a controlled manner.

Certified hearing protection
Complies with EU regulation EN 352 and may be used as personal protective equipment.

Security option: Ambient Sound Reception
As an option, the headset can be supplied with CT-ASR (Ambient Sound Reception) so that the wearer can hear ambient noises, such as warning noises, at any time via microphones in the headset.

Products with this label are developed or designed and produced in Germany by CeoTronics.

Our products with this marking reduce the noise level. The insulation value is given as SNR value.

Products with a noise-compensating microphone screen out disturbing ambient noise and thus transmit speech particularly clearly.

CeoTronics products with this marking meet the requirements of the PPE Regulation (EU) 2016/425 with the test specification EN 352 and may be used as personal protective equipment (PPE).

In February 2016, CeoTronics became the first company in the communications industry to be certified according to ISO 9001:2015. Then in 2018, CeoTronics successfully obtained certification according to the new PPE Regulation (EU) 2016/425. By 2002, CeoTronics was already successfully manufacturing according to the ATEX Guideline 94/9 EG for the first time. This certification according to the current directive 2014/34/EU could be renewed without any objections at the beginning of 2019.
